EDUCATION

Junior Software Developer

Tallinn Polytechnic School

2015 - 2018

Informatics, Bachelor's degree

Tallinn University

2019 - 2022

Business Information Technology, Master's degree

Tallinn University of Technology

2022 - Present

WORK EXPERIENCE

Front-End Developer, Internship

Industry62 OÜ

09/2017 - 02/2018

Industry62 took 5 trainees to their team and launched a project including only trainees and one scrum master. The company used an agile methodology. My job with two other trainees was to create simple web pages using typescript and angular.

Web Developer, Internship

Eesti Energia AS

05/2021 - 07/2021

During my last internship, I operated Company's Estonian, Latvian, and Lithuanian websites, where I made changes that were requested. Most of the tasks were small, which required changing design but some tasks included creating whole different components as well as making entire new web pages. I used mainly javascript, HTML, and CSS. My team was satisfied with my work and by the request, I can get a recommendation letter from my team leader.

Full-Stack Developer, Full Time

Nixor EE AS

03/2023 - Present

Achievements/Tasks

- **Android Software Development:** Contributed to the development of software for Android devices.
- **Point of Sale (POS) Systems Development:** Engaged in both front-end and back-end development for various cashier systems.
- **Enhancement of Camera Systems:** Played a key role in developing additional features for clients' camera systems.
- **Odoo Module Development:** Primarily focused on the development of various Odoo modules, gaining extensive experience in this domain.

SKILLS

Javascript

HTML

CSS

Figma

Python

SQL

Git

Photoshop

Dart

PERSONAL PROJECTS

Timemate, School Project (2020)

We had a project that required four members to be part of one project. We were given 4 months to go through most of the software development cycles, including market research, UI/UX design, and application development. My role was a full-time team leader and a half-time front-end developer and designer. Our team had great success finishing the project.

Application Design for University's Athletic Challenges, Bachelor's thesis (2022)

As my thesis, I made a UI/UX design for University's athletic challenges application. It was my first big solo project where I got to test my knowledge of UI/UX design. I gathered information about already existing alternative applications and made personas for an upcoming application. After the requirements were set I made a flowchart showing the flow of the application. The first visual part was done with LO-FI and HI-FI prototypes. To finish things off I tested my prototype with real users and thanks to their feedback made changes to the design.

OTHER ACHIEVEMENTS

Erasmus + student in Portugal (11/2017 - 12/2017)

I took part in a 1 month Erasmus + student program where my job was to create a simple website redesign for a local company. At the company's request, I also made changes to an already existing webpage in WordPress.

Erasmus + student in Hungary (03/2018 - 04/2018)

During my second Erasmus + trip I went to a local Hungarian polytechnic school where I completed a quick course about SQL. At the end of the trip, I also made a little website with other exchange students. Since two other exchange students were not from the IT department I also got to teach them how to write basic HTML, CSS, and JS.

Military service (07/2018 - 06/2019)

After finishing high school I went to the military to complete my mandatory training. I was sent to a Reconnaissance Company as a driver, medic, and anti-tank. During the training, I got a lot of experience as a team and how to manage stress in difficult circumstances.
